NAF PROCAP CAPPING VALVE

TECHNICAL BULLETIN

ANDRITZ

ENGINEERED SUCCESS

Primary characteristics

NAF ProCap, Capping valve for automated filling of wood chips to the batch digester in Pulp industries. The design provides a reliable and tight shutoff valve with long life time, supplied as standard in stainless steel for pressure ratings PN 16 and ANSI Class 150 and in sizes DN500/20", DN600/24" and DN750/30".

The valve has:

- An unique design using the eccentric hubs to load the seat and provide a tight shutoff
- An inlet neck that is drilled and tapped to accept
- Direct mounting of the chip chute
- An outlet flange in std dimension or customized to meet existing digester flange
- A stainless steel ball segment with welded overlay of Alloy 21 in the seat area
- Alloy 21 seat
- Has sealed stems with O-rings in PFM that prevent build up and results in an increased life time
- NAF Turnex high performance pneumatic actuators used for operation and eccentric hub
- Locking device, cylinders in stainless steel with spring to lock the valve for safe operation

CE-marked according to Pressure Equipment Directive (PED 2014/68/EU) module H, category III. For module H1, category IV contact NAF

TABLE 1: TECHNICAL SPECIFICATIONS FOR STANDARD DESIGN

Material	EN 1.4408
Size range	DN500, 600, 750 20", 24", 30"
Outlet flange	PN 40/ ANSI Class 300
Pressure ratings	PN 16 ANSI Class 150
Valve design	ANSI B16.34 and EN 12516
Max differential pressure	16 bar
Face to face	See page 5
Temperature range	-30 - 250°C, see graph on page 6
Test procedure	1,5 x PN at open valve According to EN 12266-1
Tightness class	Leakage test with gas according to EN 12266-1, Rate A (no visible leakage)

Other technical data will be specified by NAF for each individual application.

Applications

NAF ProCap is a batch digester capping valve for chips filling in a safe and time saving way.

Working pressure, differential pressure and temperature

MAX WORKING PRESSURE (DIAGRAM 1)

The maximum working pressure and temperature in the body depends on pressure class according to respectively flange standards. For EN1092-1:2001, see diagram 1.

Applications

NAF ProCap capping valve for automated filling of wood chips to the batch digester in pulp industries. A unique design using the eccentric hubs to load the seat and provide a tight shutoff.

Dimensions and Weight

Pneumatic actuators for DN500/700 are NAF 791290-3250 and 791290-2235
 Pneumatic actuators for DN600/800 are NAF 791390-4280 and 791290-2240
 Pneumatic actuators for DN750/950 are NAF 791390-5280 and 791290-3250
